Chandan KL

Senior Frontend Engineer

chandankl0310@gmail.com | 7259173597 | Bangalore, India | linkedin.com/in/chandankl | github.com/Chandankl5 | chandankl5.github.io/Portfolio

SUMMARY

Senior Frontend Engineer with 5+ years of experience in software development, specializing in frontend engineering. Proficient in JavaScript/TypeScript and React, with a strong focus on building responsive, accessible, and maintainable web applications and enterprise-grade products. Track record of driving measurable business outcomes through robust frontend architecture, design system quality, and adherence to strong software design principles. Invests in team growth and explores AI-assisted development workflows.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript
Tooling: Git, Docker, MCP, Figma, Mapbox, React Aria
Web Development: React, Redux, Next.js, Webpack, Node.js, Express.js, HTML, CSS

EXPERIENCE

Senior Software Engineer

Project44 | *Bangalore, India* | *Oct 2023 – Present*

- Architected and deployed an interactive split-shipment tree view for complex multi-leg shipments, managing recursive tree state and async data synchronization, driving a $1.2M ARR uplift in collaboration with design, backend, and product.
- Led the migration of a legacy application to a modern React/TypeScript frontend stack, rewriting the entire UI and rolling it out to 100% of customers with zero disruption, adhering to strong software engineering principles.
- Contributed to a React Aria-based design system, establishing accessible and reusable component patterns adopted across multiple microfrontends, enhancing maintainability and application quality.
- Extended Figma's MCP (Figma-to-code) integration with codebase conventions, including testing standards, as AI context, reducing design-to-code handoff time and supporting application quality.
- Mentored junior engineers and shaped team-level frontend technical decisions through architectural RFCs, fostering strong software design principles and collaboration within Agile teams.
- Engineered the bulk carrier CSV upload experience supporting up to 10,000 shipments with client-side parsing and inline error feedback, reducing churn by 1.5% for an enterprise application.
- Optimized Mapbox costs by consolidating redundant per-page map instances into a single shared instance, demonstrating efficient resource management and software engineering principles.

Software Engineer 2

Practo | *Bangalore, India* | *Aug 2021 – Sep 2023*

- Delivered adaptive video streaming and image stories to the Doctor Profile, driving user traffic and increasing conversion by 18%.
- Optimized Core Web Vitals (LCP, TTI) for Practo's Care product, increasing leads by 22% and enhancing application performance.
- Designed and built the Unified Health Interface (UHI) for seamless end-to-end delivery of health services, applying strong software design principles.

EDUCATION

B.E. Computer Science

Bangalore University | Bangalore, India | Aug 2017 – Jul 2021
