Chandan KL

Senior Frontend Engineer

chandankl0310@gmail.com | 7259173597 | Bangalore, India | linkedin.com/in/chandankl | github.com/Chandankl5 | chandankl5.github.io/Portfolio

SUMMARY

Senior Frontend Engineer with 5+ years of experience delivering high-impact, scalable user interfaces, specializing in frontend architecture, design system quality, and performance optimization. Proven track record of driving measurable business outcomes and contributing to engineering standards. Invests in team growth through mentoring and raising the engineering bar, while staying current with AI-assisted development workflows.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript
Tooling & Platforms: Git, Docker, Figma, Mapbox, React Aria, MCP
Web Development: React, Next.js, Redux, Webpack, Node.js, Express.js, HTML, CSS

EXPERIENCE

Senior Software Engineer

Project44 | *Bangalore, India* | *Oct 2023 – Present*

- Architected an interactive split-shipment tree view for complex multi-leg shipments, owning recursive tree state management, async data synchronisation, and cross-component state sharing, driving a $1.2M ARR uplift in collaboration with design, backend, and product.
- Led the migration of the legacy Last Mile application to a modern frontend stack, rewriting the entire UI layer and progressively rolling it out to 100% of customers, ensuring a seamless cutover with no disruption to existing workflows.
- Owned the bulk carrier CSV upload experience supporting up to 10,000 shipments, including client-side parsing, file preview, and per-row inline error feedback, reducing churn by 1.5%.
- Reduced Mapbox costs by consolidating redundant per-page map instances into a single shared instance reused across the application.
- Contributed to a React Aria-based design system, establishing accessible, reusable component patterns adopted across multiple microfrontends.
- Extended Figma's MCP (Figma-to-code) integration with codebase conventions for module structure, shared-component usage, hooks, data-fetching, and testing standards as AI context, reducing design-to-code handoff time across frontend teams.
- Mentored junior engineers through feature ownership and unblocking cross-team dependencies, and shaped team-level frontend technical decisions via architectural RFCs.

Software Engineer 2

Practo | *Bangalore, India* | *Aug 2021 – Sep 2023*

- Added adaptive video streaming and image stories to the Doctor Profile, driving more user traffic and increasing conversion by 18%.
- Improved Core Web Vitals (LCP, TTI) for Practo's Care product, increasing leads by 22%.
- Helped design and build the Unified Health Interface (UHI) for seamless end-to-end delivery of health services.

EDUCATION

B.E. Computer Science

Bangalore University | Bangalore, India | Aug 2017 – Jul 2021
