Chandan KL

Senior Frontend Engineer

chandankl0310@gmail.com | 7259173597 | Bangalore, India | linkedin.com/in/chandankl | github.com/Chandankl5 | chandankl5.github.io/Portfolio

SUMMARY

Senior Frontend Engineer with 5+ years of experience in software development, specializing in frontend engineering. Strong proficiency in JavaScript/TypeScript and React, with a focus on building responsive, accessible, and maintainable web applications. Proven track record of delivering high-impact products at scale, driving measurable business outcomes, and applying strong software design principles. Invests in team growth and stays current with AI-assisted development workflows.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript
Tooling: Git, Docker, MCP, Figma, Mapbox, React Aria
Web Development: React, Redux, Next.js, Webpack, Node.js, Express.js, HTML, CSS

EXPERIENCE

Senior Software Engineer

Project44 | *Bangalore, India* | *Oct 2023 – Present*

- Architected an interactive split-shipment tree view for complex multi-leg shipments, owning recursive tree state management, async data synchronisation, and cross-component state sharing, driving a $1.2M ARR uplift in collaboration with design, backend, and product.
- Led the migration of a legacy Last Mile application to a modern frontend stack, rewriting the entire UI layer and progressively rolling it out to 100% of customers with no disruption to existing workflows.
- Contributed to a React Aria-based design system, establishing accessible, reusable component patterns adopted across multiple microfrontends, enhancing maintainability.
- Extended Figma's MCP (Figma-to-code) integration with codebase conventions, including module structure, shared-component usage, hooks, data-fetching, and testing standards, reducing design-to-code handoff time across frontend teams.
- Mentored junior engineers through feature ownership and unblocking cross-team dependencies, and shaped team-level frontend technical decisions via architectural RFCs, promoting strong software design principles.
- Owned the bulk carrier CSV upload experience supporting up to 10,000 shipments, including client-side parsing, file preview, and per-row inline error feedback, reducing churn by 1.5%.
- Reduced Mapbox costs by consolidating redundant per-page map instances into a single shared instance reused across the application, demonstrating optimization.

Software Engineer 2

Practo | *Bangalore, India* | *Aug 2021 – Sep 2023*

- Improved Core Web Vitals (LCP, TTI) for Practo's Care product, increasing leads by 22%, demonstrating focus on application quality and performance.
- Added adaptive video streaming and image stories to the Doctor Profile, driving more user traffic and increasing conversion by 18% using web-based programming.
- Helped design and build the Unified Health Interface (UHI) for seamless end-to-end delivery of health services, applying strong software design principles.

EDUCATION

B.E. Computer Science

Bangalore University | Bangalore, India | Aug 2017 – Jul 2021
